

## **Carrie A. Scott**

Manager

### **Professional Experience**

Carrie Scott has more than eight years of experience in the use of database technology to produce effective, timely solutions for her clients' complex needs. She has expertise in electronic data collection, data management, analysis, and litigation support for various clients in industries such as healthcare, pharmaceutical, managed care, construction, and insurance.

While at KCIC, Ms. Scott has participated in every facet of litigation discovery from client interviews and documentation collection to data management and production. She has successfully created uniform data structures to manage all collected files and has implemented various tools designed to illustrate data migration from one system to another.

Additionally, Ms. Scott's unique combination of litigation-related skills and extensive technical knowledge has allowed her to specialize in the creation of complex databases used to track, analyze and model a myriad of information. Ms. Scott is frequently called upon to identify and correct programmatic issues in database systems and to analyze and identify inconsistencies in Expert testimony analysis.

Prior to joining KCIC, Ms. Scott worked for Navigant Consulting in the Litigation Support practice focusing on the Healthcare and Construction industries.

### **Education**

2000 - B.S., Computer Science and Economics, Tufts University
